

XWiki included in the Gartner's Hype Cycle for Open Source Software 2010

XWiki is part of the latest Gartner's Hype Cycle for Open Source Software (in the « Open Source Social Software » section), published on 10 August 2010.

Paris (France), 16 September 2010

The Gartner's Hype Cycle for Open Source Software is an annual report allowing to measure the maturity and market saturation of open-source solutions (classified according different categories like security tools, elearning applications, e-commerce software...) across the IT industry.

XWiki is mentioned in the « Social Software » category as a mature open source content management product, portal, community support platform and Web application framework, like his proprietary equivalents. But moreover, it is flexible and propose low acquisition costs; a way for breaking the barriers.
